SUJAL BERGAL

B.Tech CSE (Artificial Intelligence & Machine Learning) | AI/ML & Software Development

7058549405 | sujalbergal@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Third-year Computer Science Engineering student specializing in AI & ML, with hands-on experience in machine learning, full-stack development, Android development, databases, Firebase, FastAPI, React, and IoT. Built academic and hackathon projects spanning AI assistants, emergency-response platforms, smart-city systems, disease detection, and embedded smart parking. Seeking AI/ML or software engineering internship opportunities.

EDUCATION

Pimpri Chinchwad University (PCU) **CGPA: 7.6**

B.Tech in Computer Science & Engineering (AI & ML), 2024-2028

TECHNICAL SKILLS

Languages: Python, Java, C, C++
AI / ML: TensorFlow, Keras, scikit-learn, CNN, SVM, Logistic Regression, Random Forest, XGBoost
Web / Backend: React, Vite, FastAPI, Django, REST APIs, Firebase / Firestore
Database: SQL, DBMS, MongoDB concepts
Mobile / IoT: Android development, Arduino, ESP32, sensors, servo integration
Tools: Git, GitHub, VS Code, Android Studio, Google Colab

INTERNSHIP EXPERIENCE

Android Developer Virtual Internship - EduSkills / Google for Developers | Oct-Dec 2025

- Completed a 10-week virtual internship focused on Android application development through the AICTE-EduSkills National Internship program.

SQL & Database Management Systems with Project - EduSkills Academy

- Completed an 8-week internship covering relational database design, SQL, NoSQL/MongoDB, data integration, database security, optimization, and full-stack database integration.
- Completed project work in SQL Movie Database Analytics and data-driven business analytics/dashboard concepts.

PROJECTS

CampusOS AI - Student Assistant | *React, Vite, FastAPI, Gemini API*

- Designed an AI-powered student platform with AI Notes, smart dashboard, attendance prediction, placement mode, previous papers, events, and semester-planning features.
- Integrated a FastAPI chat backend with Gemini and built a responsive React/Vite interface.

WariSphere / Varisathi | *FastAPI, Firebase Firestore, WebSocket, Python*

- Built backend services for a hackathon platform, including SOS alert creation/retrieval, Firebase health checks, Firestore persistence, and real-time WebSocket support.
- Implemented structured SOS records with user, location, emergency type, accuracy, status, and timestamps.

Smart Parking Management System | *ESP32/Arduino, IR Sensors, Servo, LCD*

- Developed an automated parking prototype using entry/exit sensors, servo-controlled gate operation, and real-time slot availability display.

AI Disease Detection | *Python, TensorFlow/Keras, scikit-learn, Django*

- Developed disease-detection prototypes using CNN and classical ML models, with a Django-based interface for model-driven predictions.

SheharAI - Smart City Digital Twin | *AI, Data Analytics, Smart-City Architecture*

- Designed a digital-twin concept for smart-city monitoring and decision support, including system architecture and AI-enabled urban use cases.

CERTIFICATIONS & ADDITIONAL

Certifications: EduSkills Android Developer Virtual Internship; EduSkills SQL & Database Management Systems Internship; Coursera certifications
Languages: English, Marathi, Hindi
